

**Science & Technology series N° 334**  
**Special Issue – Proceedings Lille 2007**

**Content**

Forewords	Landais & Aranyossy	5
The Meuse/Haute-Marne Underground Research Laboratory: seven years of scientific investigations	Delay <i>et al</i>	7 - 21
European bentonites as alternatives to MX-81	D. Koch	23 - 30
Assessment of backfill materials and methods for deposition tunnels	Keto <i>et al</i>	31 - 37
Testing Possible Czech Waste Disposal Concept and Clay Material through Real Scale Mock-Up (Dismantling and Preliminary Geotechnical Results)	Pacovsky <i>et al</i>	39 - 50
Hydraulic in-situ measurements in the Opalinus clay in the frame of a heater test performed at the Mont Terri URL	Wieczorek & Jockwer	51 - 56
A study on extrusion behavior of buffer material into fractures using X-ray CT method	Tanai & Matsumoto	57 - 64
The engineering barrier experiment at Mont Terri Rock Laboratory	Garcia-Sineriz <i>et al</i>	65 - 75
Development of water content adjust method by mixing powdered-ice and chilled-bentonite : application to the construction of bentonite engineered barriers by shotclay method	Kobayashi <i>et al</i>	77 - 84
Gas migration through bentonite/sand : lessons learned from the GMT in-situ test	Shimura <i>et al</i>	85 - 93
Installation and evaluation of a large-scale in-situ shaft seal experiment in Boom Clay	Van Geet <i>et al</i>	95 - 109
Influence of the transport parameter uncertainty on the long-term safety of nuclear waste repositories in clay formations	Ruebel <i>et al</i>	111 - 120
